

Friday Cancer Centre Seminar

Fall 2022

KI 0815-0900

	Title	Speaker
2 September	Boosting the therapeutic potential of engineered T cells through revamped synthetic circuits	<i>Axel Hyrenius Wittsten</i>
9 September	Using Immune Cell Reprogramming to Reinstate Anti-Cancer Immunity	<i>Fábio Fiúza Rosa</i>
16 September	OncoAlert and the (r)evolution of Digital Oncology Communications	<i>Gilberto Morgan</i>
23 September	Joining conjugation chemistry and advanced MRI to overcome poor radiotherapy efficacy in heterogeneous tumors	<i>Joanna Strand & Filip Szczepankiewicz</i>
30 September	Optimization of irradiation in anal cancer	<i>Martin P Nilsson</i>
7 October	Can we avoid lymph node dissection in early stage breast cancer?	<i>Lisa Rydén</i>
14 October	Exploring and exploiting radiotherapy- and hypoxia-induced changes in the brain tumor microenvironment	<i>Alexander Pietras</i>
21 October	Cellular reprogramming: a novel treatment for glioblastoma	<i>Johan Bengzon</i>
28 October	Individualizing Preoperative Chemotherapy Treatment in Breast Cancer - Through Translational Clinical Trials	<i>Siker Kimbung</i>
4 November	<i>No seminar - Höstlov</i>	
11 November	Hypoxia as a predictive marker for individualized radiotherapy	<i>Gabriel Adrian</i>
18 November	The T-REX trial: Tailored regional radiotherapy using gene expression profiling in clinically node-negative breast cancer	<i>Sara Alkner</i>
25 November	<i>No seminar - dissertation Jessica Wihl</i>	
2 December	Immune phenotypes of Head and Neck cancer	<i>Malin Lindstedt</i>
9 December	<i>No seminar - ASH + SABCS</i>	
16 December	<i>No seminar - dissertation Laura Martin</i>
